

90-Degree Carbon Steel Seamless Pipe Elbow

This 90-degree carbon steel elbow is a pipe fitting designed for connecting pipes at a right angle. Its seamless construction ensures reliability in high-pressure and high-temperature environments.

Product Overview

Industrial Seamless Pipe Elbow

This 90-degree carbon steel seamless pipe elbow is engineered for high-pressure and high-temperature industrial applications, ensuring reliable and durable connections. Designed with precise dimensions to facilitate smooth flow, it meets rigorous international standards for quality and performance. It is a versatile component suitable for a wide range of piping systems requiring robust, long-lasting fittings.

Technical Specifications

Wall Thickness

- Sch5
- Sch160
- XS
- XXS
- STD

Available Materials	Carbon Steel, Stainless Steel, Alloy Steel
---------------------	--

Manufacturing Standards	ANSI, ASME, API 5L, DIN, JIS, BS, GB
-------------------------	--------------------------------------

Customization	Yes
---------------	-----

Quality & Compliance

Certifications

ISO 9001:2000
