

90-Degree Corner Clamp

This corner clamp is designed to hold workpieces at a 90-degree angle. Its adjustable jaws accommodate various material thicknesses, making it suitable for woodworking and metalworking.

Product Overview

Precision Corner Clamping

This 90-degree corner clamp is an essential tool for achieving precise alignment in woodworking and metalworking projects. It features adjustable jaws designed to securely hold workpieces of varying thicknesses at a perfect right angle. Built with durable materials, this clamp ensures long-lasting performance and reliable stability for professional assembly and fabrication tasks.

Technical Details

Clamping Angle	90 degrees
