

9.0 HP 4-Stroke Gasoline Engine

This 4-stroke gasoline engine provides 9.0 HP for various applications. Its robust construction ensures reliable performance for powering equipment such as generators and water pumps.

Overview

High-Performance 4-Stroke Engine

The 9.0 HP 4-Stroke OHV Gasoline Engine is a reliable and powerful solution designed for versatile industrial and residential applications. Engineered for efficiency and durability, this unit features a robust construction suitable for powering generators, water pumps, and various heavy-duty machinery. Its dual-start system and optimized combustion design ensure consistent performance and ease of use in demanding environments.

Performance

Maximum Output

9 HP

Power

3600 rpm

Speed

Displacement 270 cc

Fuel Consumption 290 g/kw.h

Technical Specifications

Engine Type 4-Stroke OHV Gasoline Engine

Starting System Recoil starting, Electric starting

Ignition System Transistorized ignition

Capacities

Fuel Tank Capacity 5.9 L

Oil Capacity 1.1 L

Dimensions and Weight

Dry Weight	27 kg
Dimensions (LxWxH)	380x430x410 mm
