

900 kVA Containerized Diesel Generator

This 900 kVA diesel generator is mounted in a container. The container provides protection and facilitates easy transportation for industrial applications.

Product Overview

Industrial Power Solution

This 900 kVA containerized diesel generator is engineered for demanding industrial applications requiring reliable, mobile power. Housed in a durable, weather-resistant enclosure, the unit ensures protection against the elements while facilitating easy transportation and deployment. Equipped with advanced monitoring controls and robust cooling systems, it provides a stable and continuous power supply for both prime and standby operations.

Performance Specifications

Power Rating

900 kVA

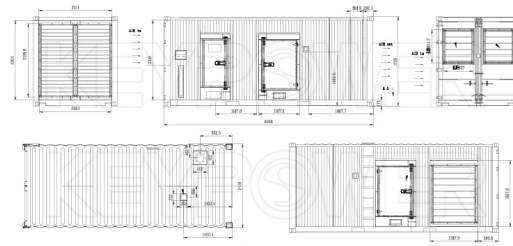

Power Output

Operational Metrics

Metric	Value	Unit
Frequency	50	Hz
Voltage Range	400	V

Design & Construction

Technical diagram detailing container dimensions and airflow configuration.

Container Features

- Weather-resistant construction
- Ventilation louvers for optimal cooling
- Access doors for maintenance
- Designed for easy transportation and deployment

Enclosure Type

Containerized

Control & Safety

Controller Type

Automated digital controller with monitoring capabilities

Safety Features

Emergency Stop, Analog Voltage Monitoring, Analog Current Monitoring, Auto Mode, Power Switch
