Product Overview

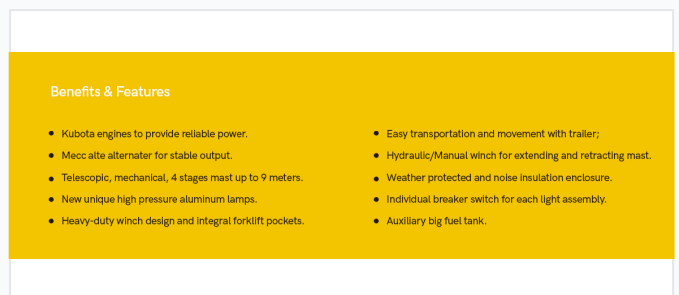

High-Performance Hydraulic Light Tower

This robust hydraulic light tower is engineered for demanding environments, providing reliable and powerful illumination for construction sites, emergency response, and large-scale outdoor events. Featuring a 9-meter telescopic mast and energy-efficient LED lighting, it ensures extensive coverage while maintaining low power consumption. The integrated hydraulic system allows for smooth, safe mast elevation, while the heavy-duty trailer design facilitates easy transportation and rapid setup in the field.

Technical Specifications

Hydraulic light tower featuring a 9-meter high mast equipped with energy-efficient LED lights.

Detailed view of the lighting tower components, including the telescopic mast and high-pressure lamp assembly.

- Benefits & Features**
- Kubota engines to provide reliable power.
 - Mecc alte alternator for stable output.
 - Telescopic, mechanical, 4 stages mast up to 9 meters.
 - New unique high pressure aluminum lamps.
 - Heavy-duty winch design and integral forklift pockets.
 - Easy transportation and movement with trailer;
 - Hydraulic/Manual winch for extending and retracting mast.
 - Weather protected and noise insulation enclosure.
 - Individual breaker switch for each light assembly.
 - Auxiliary big fuel tank.

Maximum Mast Height	9 m
Mast Stages	4
Mast Operation	Hydraulic / Manual Winch
Lighting Technology	High-pressure LED
Safety Features	Individual Breaker Switches, Noise Insulation, Weather-protected Enclosure

Operational Features

The light tower is mounted on a rugged trailer for easy transport and positioning.

Transportation

- Integrated Forklift Pockets
- Trailer Mounted
- Heavy-duty Design

Compliance & Standards

OTHER CERTIFICATIONS

Adherence to international standards for quality management and product safety.
