Product Overview

Smart Motion-Activated Lighting

This 9W E27 LED bulb features an integrated microwave motion sensor designed for automatic, energy-efficient illumination. It detects movement within a 6-8 meter radius, activating the light instantly and turning it off after a set delay period. With options for daylight sensing and adjustable operation modes, this bulb is an ideal solution for corridors, stairways, and storage areas where hands-free lighting is required.

Technical Specifications

Available Delay Times

- 5s
- 20s
- 30s
- 40s
- 50s
- 60s

Power Consumption	9 W
Base Type	E27
Incandescent Equivalent	60 W
Sensor Technology	Microwave
Warranty Period	2 years

Sensor Capabilities

Detection Metrics

8 m

Max Detection Range

Operating Modes

Mode	Active State	Standby State
Type A	100% Brightness	Off (0%)
Type B	100% Brightness	Dim (20%)
Type C	100% Brightness (Night Only)	Off (0%)

Sensor Features

Daylight Sensor Optional, Temperature Independent, Dust Resistant, No Dead Zone

Applications

Recommended Use

Corridors, Stairways, Warehouses, Basements, Offices, Bathrooms, Closets
