

AA AAA Ni-MH Ni-Cd Battery Charger

This battery charger is designed for charging AA and AAA Ni-MH and Ni-Cd rechargeable batteries. It features four independent charging channels and LED indicators to display the charging status for each battery.

Product Overview

Versatile Battery Charging Solution

This universal battery charger is designed to accommodate both AA and AAA Ni-MH and Ni-Cd rechargeable batteries. Featuring four independent charging channels, it offers the flexibility to charge between one and four batteries simultaneously with individual status monitoring. Built-in safety protocols, including overcharge, short circuit, and reverse polarity protection, ensure reliable and efficient performance for both home and travel applications.

Technical Specifications

| | |
|-----------------|-------------|
| Input Voltage | AC 100-240V |
| Input Frequency | 50/60Hz |
| Output Voltage | 1.48 V |

Performance Metrics

Charging Current

| | |
|--------------------------------------|---------------------------------------|
| 400 mA AA Charging Current | 200 mA AAA Charging Current |
|--------------------------------------|---------------------------------------|

Features & Safety

| | |
|--------------------|--|
| Safety Protections | Overcharge Protection, Short Circuit Protection, Reverse Polarity Protection |
| Charging Channels | 4 |
| Status Indicators | Yes |

Compatibility

Supported Battery Types

- AA Ni-MH
- AAA Ni-MH
- AA Ni-Cd
- AAA Ni-Cd
