Product Overview

Reliable Power Solution

This AA carbon-zinc battery is designed to provide a cost-effective and dependable power source for a wide range of electronic devices. Featuring a durable aluminum foil jacket, it is engineered to prevent leakage and deformation while ensuring a stable 1.5V output. Environmentally conscious, the battery is completely free of mercury and cadmium, making it a safe choice for everyday applications.

Technical Specifications

Nominal Voltage

1.5 V
Voltage

Chemical System	Carbon-zinc (Zn-MnO ₂)
-----------------	------------------------------------

Shelf Life	3 years
------------	---------

Compliance & Standards

Heavy Metal Content
Mercury Free • Cadmium Free

Regulatory Compliance	IEC Standard, ROHS, EU 2006/66/EC
-----------------------	-----------------------------------

Physical Construction

Quality Assurance

- No stains
- No deformation
- No leakage
- No cracks

Jacket Material

Aluminum Foil

Applications

Recommended Applications

- Personal stereos
- Digital cameras
- Shaving devices
- Low-drain electronic devices
