Product Overview

Reliable General Purpose Power

This AA size dry cell battery is designed for consistent performance in a variety of everyday electronic devices. Featuring a durable Zinc-Manganese chemistry and a protective PVC jacket, it provides a dependable power source for household electronics, toys, and portable equipment. Built with a metal top and bottom for structural integrity, this battery meets standard performance requirements for general use.

Technical Specifications

Battery Size	AA (UM-3)
Chemistry	Zinc-Manganese
Nominal Voltage	1.5 V

Performance Metrics

Minimum Discharge Time

80 mins

Minimum Discharge

Construction & Safety

Construction Materials

- PVC Jacket
- Metal Top
- Metal Bottom

Safety Guidelines

Do not recharge, Do not destroy in fire

Compliance

Compliance Standards

GB/T8897.2
