

# AA Rechargeable Ni-MH Battery

Rechargeable Nickel-Metal Hydride (Ni-MH) batteries in AA size are designed for various electronic devices. These batteries offer a voltage of 1.2V, promoting sustainability and cost-effectiveness.

## Product Overview

### High-Performance AA Rechargeable Batteries

These AA size Nickel-Metal Hydride (Ni-MH) rechargeable batteries are engineered for reliable performance in a wide range of portable electronic devices. By offering a rechargeable solution, they provide a sustainable and cost-effective alternative to single-use batteries. They are perfectly suited for common household and professional electronics such as remote controls, toys, and portable gadgets.

## Technical Specifications

### Nominal Voltage

<b>1.2 V</b> Voltage
-------------------------

### Battery Size

AA

### Battery Chemistry

Nickel-Metal Hydride (Ni-MH)

## Features & Compatibility

### Recommended Uses

- Remote controls
- Toys
- Portable electronics

### Rechargeable

Yes
