Product Overview

High-Performance Abrasive Cloth

The 1131A abrasive cloth roll features specialized treated cube-shaped abrasives bonded with a resin-over-resin system on a durable JWT cloth backing. Engineered for superior grinding life and consistent polishing scratch patterns, this material is ideal for demanding industrial applications. It is specifically designed to be converted into abrasive belts for efficient processing of high-hardness materials.

Technical Specifications

Grit Range	D3 - D45
Backing Material	JWT Cloth
Bonding System	Resin over Resin

Performance Features

Abrasive Grain	Treated Cube Shape
Key Benefits	Extended Grinding Life, Consistent Scratch Pattern, High Hardness Material Compatibility, Efficient Material Removal

Applications

Suitable Materials

- Metal
- Alloy
- Stainless Steel
- High Hardness Materials

Primary Usage

Abrasive Belt Conversion • Grinding • Polishing
