

Abrasive Compound for Polishing

This abrasive compound is used for polishing and finishing applications. It is available in #180 and #240 grit.

Product Overview

Professional Polishing Compound

This abrasive compound is engineered for high-performance polishing and finishing applications. Designed to meet rigorous industrial standards, it provides consistent material removal and surface refinement. Available in multiple grit sizes, it is an essential tool for achieving precise finishes on a variety of surfaces.

Technical Specifications

Available Grit Sizes	#180, #240
Primary Application	Polishing and Finishing

Packaging & Logistics

Packaging Format	Labeled boxes with individual sample containers
