

Abrasive Cut-Off Saw for Metal

This abrasive cut-off saw is a power tool designed for cutting metal. It utilizes a high-speed abrasive disc to grind through the material, ensuring efficient and precise cuts.

Product Overview

Professional Abrasive Cut-Off Saw

The SQ-40-1 abrasive cut-off saw is a robust power tool specifically engineered for precision metal cutting applications. Utilizing a high-speed abrasive disc, it efficiently grinds through various metal materials with stability and control. Integrated with a professional-grade clamping mechanism and an ergonomic handle, it is an essential piece of equipment for metal fabrication workshops and construction sites requiring accurate, straight cuts.

Technical Specifications

Model Identifier	SQ-40-1
Core Function	Straight metal cutting
Cutting Method	High-speed abrasive disc
Safety and Control	Workpiece Clamping, Ergonomic Handle, Controlled Cutting

Application

Recommended Uses

- Metal Fabrication
- Construction Sites
- Workshop Metal Processing
