

Abrasive Cutting Disc 41A40R8BF 80m/s

This abrasive cutting disc is designed for metal cutting applications. It is engineered for high-speed cutting at 80m/s and ensures efficient material removal.

Overview

High-Performance Metal Cutting Disc

This abrasive cutting disc is engineered for professional metalworking and fabrication tasks, offering efficient material removal and precise cuts. Designed for multi-purpose use on both metal and stainless steel (INOX), it features a reinforced construction to ensure durability and safety during high-speed operations. With a maximum operating speed of 80m/s, it provides reliable performance for demanding industrial applications.

Technical Performance

Performance Metrics

80 m/s

Max Operating Speed

13300 RPM

Maximum Rotation

Dimensions

Metric Dimensions	115 x 1.0 x 22.23 mm
Imperial Dimensions	4.5" x 3/64" x 7/8"

Material & Application

Application Type

Multi-Purpose • Cutting

Material Compatibility	Metal, INOX, Stainless Steel
------------------------	------------------------------

Compliance & Safety

Safety Standards

- EN12413 Standard Compliance
- MPA Z-14197 Certified
- Reinforced construction for safety

Technical Specifications

Specification Code	A60T-BF
Compatible Equipment	Angle Grinders
