

Abrasive Flap Wheel and Disc Set

This set includes abrasive and grinding wheels for surface finishing and material removal. It features cylindrical flap wheels for internal surface preparation and radial flap discs for edge blending and polishing.

Product Overview

Versatile Abrasive Solution

This comprehensive abrasive set is engineered for diverse surface finishing and material removal tasks. Featuring a combination of shank-mounted cylindrical flap wheels for tight spaces and radial flap discs for broader surface work, it provides a complete solution for deburring, contouring, and polishing. Built with durable abrasive materials, these tools ensure consistent performance and longevity in demanding professional environments.

Technical Details

Included Components

- Cylindrical flap wheels with integrated shanks
- Radial flap discs

Mounting Type

Shank-mounted (for drill compatibility)

Applications

Primary Applications

Internal surface preparation, Contouring, Edge blending, Deburring, Surface polishing
