

Abrasive Grinding Wheel

This abrasive grinding wheel is designed for precision material removal and surface finishing. Constructed from durable abrasive grains bonded with a resin matrix, this wheel offers exceptional cutting efficiency and longevity.

Product Overview

High-Performance Abrasive Grinding Wheel

This high-performance abrasive grinding wheel is engineered for precision material removal and superior surface finishing. Constructed with durable abrasive grains held within a robust resin matrix, it delivers exceptional cutting efficiency and extended service life. Designed for versatility, this wheel is an ideal solution for deburring, sharpening, and stock removal across a wide range of metals, alloys, and composites.

Technical Details

Compatible Materials

- Metals
- Alloys
- Composites

Construction

Abrasive grains bonded with resin matrix

Primary Applications

Deburring, Sharpening, Stock Removal, Surface Finishing

Performance Features

Key Performance Metrics

1 Minimal

Heat Generation

Operational Benefits

High Cutting Efficiency • Long Service Life • Concentric Rotation • Reduced Material Distortion
