

Abrasive Grinding Wheel

This precision-engineered abrasive grinding wheel is designed for demanding material removal applications. Constructed from high-quality abrasive grains bonded with a durable matrix, it offers consistent surface finish and long life.

Overview

Precision Grinding Performance

This precision-engineered abrasive grinding wheel is designed for demanding material removal applications in industrial and manufacturing environments. Constructed from high-quality abrasive grains bonded with a durable matrix, it delivers exceptional cutting performance, long service life, and a consistent surface finish. It is a versatile solution suitable for sharpening, shaping, and finishing tasks across a wide range of materials.

Technical Specifications

Compatible Materials

- Metals
- Composites
- Stone

Construction

High-quality abrasive grains • Durable bond matrix

Primary Applications

Sharpening, Shaping, Finishing, Material Removal
