

Abrasive Grinding Wheel for Material Removal

Abrasive grinding wheel designed for use with electric tools. It is constructed from durable materials for effective material removal and long-lasting use.

Product Overview

High-Performance Material Removal

This abrasive grinding wheel is engineered for effective material removal in professional industrial applications. Designed for compatibility with standard electric power tools, it features a circular geometry with a reinforced central mounting hole for secure operation. The specialized grooved surface pattern is specifically crafted to enhance grinding efficiency and extend the service life of the abrasive material.

Technical Specifications

Construction

Durable Material • Long-lasting

Design Features

Circular Shape, Grooved Surface, Electric Tool Compatible

Primary Application

Material Removal
