

Abrasive Grinding Wheel for Metal

This abrasive grinding wheel is designed for cutting and grinding metal. It features a reinforced resin bond for durability and safety.

Product Overview

High-Performance Abrasive Grinding Wheel

This abrasive grinding wheel is engineered specifically for high-efficiency cutting and grinding of metal materials. Featuring a reinforced resin bond, it ensures superior durability and enhanced safety during demanding industrial operations. It is fully compatible with standard angle grinders, making it a versatile tool for various metalworking tasks.

Technical Specifications

Maximum Operating Speed

80 m/s

Max Speed

Model Identifier

27WA24Q8BF

Construction Features

Reinforced Resin Bond, Metal Grinding, Metal Cutting
