

Abrasive Grinding Wheel for Metal

Abrasive grinding wheel designed for metalworking. It is suitable for cutting and grinding various metal materials and features a reinforced resin bond for enhanced durability and safety.

Product Overview

High-Performance Metal Grinding

This abrasive grinding wheel is engineered for demanding metalworking applications, offering reliable cutting and grinding capabilities. Constructed with a reinforced resin bond, it ensures enhanced durability and operational safety during use. It is specifically designed to be compatible with standard angle grinders, making it a versatile tool for professional metal fabrication tasks.

Technical Specifications

Primary Application	Metalworking
Bond Material	Reinforced Resin
Tool Compatibility	Angle Grinder

Compliance & Standards

Safety Compliance
SAMA Certified

Country of Origin	China
