

Abrasive Grinding Wheel for Metal

Abrasive grinding wheel designed for cutting and grinding metal. It features a blend of abrasive grains and bonding agents for efficient material removal and durability.

Product Overview

High-Performance Abrasive Grinding Wheel

This abrasive grinding wheel is engineered specifically for efficient metal cutting and grinding applications. It utilizes a precision-balanced blend of abrasive grains and robust bonding agents to ensure superior material removal rates and extended service life. Designed for compatibility with standard angle grinders and power tools, this wheel is built to maintain structural integrity during high-speed operations.

Technical Specifications

Maximum Operating Speed

72 m/s

Max Speed

Compatible Tools

- Angle Grinders
- Power Tools

Suitable Applications

Metal Cutting, Metal Grinding

Compliance & Safety

Safety Compliance

High-Speed Operation Certified
