

Abrasive Grinding Wheel for Stainless Steel

This abrasive grinding wheel is designed for stainless steel and general purpose cutting. It features low vibration, improved safety, and optimized performance.

Overview

High-Performance Abrasive Grinding Wheel

This abrasive grinding wheel is engineered specifically for cutting stainless steel and general-purpose metal applications. It features advanced design elements to ensure low vibration during operation, significantly improving safety and user comfort. Built for optimized performance, this wheel delivers consistent results in demanding industrial environments.

Technical Specifications

Maximum Operating Speed	80 m/s
Specification Code	27 WA24R

Certifications & Standards

Compliance Standards	MPA Z-01676, ISO 9001
----------------------	-----------------------

Features

Product Highlights

Low Vibration • Improved Safety • Stainless Steel Compatible

Applications

Compatible Materials

- Stainless Steel
- General Purpose Steel
