

Abrasive Mesh Cloth for Polishing

This mesh cloth uses abrasive alumina or silicon carbide with a glass fiber base. It is designed for double-sided sanding, polishing painted walls, and removing paint from various metal surfaces.

Product Overview

Abrasive Mesh Cloth for Professional Polishing

This high-performance abrasive mesh cloth is engineered for demanding polishing and surface preparation tasks. Designed with a versatile mesh structure, it provides consistent results across a wide range of grit levels. Ideal for industrial and workshop applications, this material ensures durability and reliable performance for professional finishing needs.

Technical Specifications

Sheet Dimensions

- 93 x 230 mm
- 115 x 280 mm

Available Grit Sizes

36, 40, 50, 60, 80, 100, 120, 150, 180, 240, 320, 400, 600
