

Abrasive Roll for Metal Grinding

This abrasive roll is designed for metal grinding applications. It features a durable backing and sharp abrasive grains for efficient material removal.

Product Overview

High-Performance Abrasive Roll

This high-performance abrasive roll is specifically engineered for professional metal grinding applications. Featuring a durable backing and sharp abrasive grains, it ensures efficient material removal and extended service life. The convenient roll format allows for easy dispensing and customization, making it an ideal choice for deburring, surface preparation, and weld blending tasks.

Technical Specifications

Model Identifiers

- P2833
- P2333
- P2933
- PZ-150
- PZ933

Abrasive Grain

AZ-180

Supported Applications

Deburring, Surface Preparation, Weld Blending, Metal Grinding
