

AC Arc Welding Machine with Adjustable Current

This AC arc welding machine is designed for a variety of welding applications. It features adjustable current settings, robust construction, and integrated wheels for portability, making it suitable for both industrial and workshop environments.

Overview

Professional AC Arc Welding Solution

This AC arc welding machine is engineered for versatility and durability in demanding industrial and workshop environments. Featuring adjustable current settings, it provides precise control for a wide range of welding tasks. The robust design includes integrated wheels, ensuring excellent portability and ease of movement across the workspace.

Technical Specifications

Adjustable Current Settings

- 80
- 160
- 240
- 320
- 400

Model Number	BX1-400-2
Current Unit	Amperes (A)

Features

Suitable Environments

Industrial • Workshop

Key Features	Adjustable Current, Portable, Industrial Grade, Robust Construction
