Product Overview

High-Performance AC Capacitor Motor

The YYF-7818 is a high-performance capacitor-run AC motor specifically engineered for stand fans and ventilation systems. Designed for reliability and consistency, it features a robust metal housing and efficient internal components suitable for both residential and commercial applications. Its compact form factor facilitates easy integration into various fan designs, ensuring optimal airflow and durable, long-term operation.

Technical Specifications

Common Applications

- Stand Fans
- Ventilation Equipment
- Air Conditioning Systems
- Residential Cooling
- Commercial Ventilation

Motor Type

Capacitor-run AC Motor

Compliance and Quality

Environmental Compliance

RoHS Compliant • REACH Compliant

Certifications

CE, UL, VDE, 3C, ISO9001, ISO14001
