

AC Electric Haulage Shearer

AC Electric Haulage Shearer designed for mining applications. It utilizes an AC variable frequency electric traction system for effective and reliable coal extraction.

Overview

High-Efficiency Mining Solution

The MG200/500-QWD AC Electric Haulage Shearer is engineered for high-performance coal extraction in demanding mining environments. It features an advanced AC variable frequency electric traction system, ensuring reliable operation and precise control during the extraction process. This robust machine is designed to maximize operational efficiency and durability for large-scale mining applications.

Technical Specifications

Model Number	MG200/500-QWD
Traction System	AC Variable Frequency Electric Traction
Application	Mining, Coal Extraction

Key Features

Performance Highlights

200 kW
Rated Power

500 kW
Total System Capacity
