

Active and Reactive Power Meter

This meter displays both active and reactive power. It is available in two models with different dimensions and mounting hole sizes, and includes alarm and transmission outputs.

Overview

Dual-Display Power Monitoring

This Active and Reactive Power Meter provides precise, real-time monitoring of electrical power systems. It features a dual-display design with red digital tubes and light bars for active power, and green indicators for reactive power, ensuring clear visibility in industrial environments. Designed for panel mounting, this instrument supports integrated alarm outputs and transmission outputs for comprehensive system control.

Technical Specifications

Output Functions

- ALM1: Active Power Alarm
- ALM2: Reactive Power Alarm
- OUT1: Active Power Transmission Output
- OUT2: Reactive Power Transmission Output
- RS-485 Communication

Display Configuration

Red Active Power Display, Green Reactive Power Display, Digital Tube Indicators, Light Bar Visualization

Dimensions and Mounting

Model Specifications

Model Orientation	Outer Dimensions (mm)	Mounting Hole (mm)
Horizontal	160 x 80 x 115	152 x 76
Vertical	80 x 160 x 115	76 x 152
