

Adjustable 600mm Speaker Stand

This adjustable speaker stand is constructed from high gauge cold rolled steel. It is designed for two speakers and includes a universal hardware pack.

Product Overview

Professional Speaker Support

This 600mm speaker stand is engineered from high-gauge cold-rolled steel to provide a stable, vibration-resistant platform for your audio equipment. Designed for versatility, it includes a universal hardware pack for easy assembly and is available in either a sleek silver or white powder-coated finish. This stand is an ideal solution for home theaters or professional studio environments requiring reliable speaker positioning.
