

Adjustable Air Caster Rigging System

This air caster rigging system is designed for easy adjustment and precise control of air pressure distribution. It facilitates the smooth movement of heavy loads with near-frictionless operation.

Overview

Precision Load Moving System

This adjustable air caster rigging system is engineered for the frictionless movement of heavy industrial loads. By utilizing air bearing technology, the system ensures smooth, controlled transport of machinery and equipment. The setup includes a control manifold with pressure gauges for precise, independent adjustment of each caster, providing optimal stability and even load distribution.

Performance Specifications

Standard Load Capacities

- 10T
- 16T
- 20T
- 32T (70,400 LBS)
- 48T (105,600 LBS)
- 60T

Customization

Yes

Service & Support

Warranty

1 Year Warranty

Industry Experience

20 Years

Years of Production
