

Adjustable Angle Drill Press

This radius drill is a versatile machine tool designed for precision drilling operations. The drill head can be rotated and swung to various positions, allowing for drilling at different angles and in hard-to-reach areas.

Product Overview

Precision Drilling Performance

The Radius Drill is a professional-grade machine tool engineered for high-precision drilling operations. Featuring a robust cast iron base and column, the unit minimizes vibration to ensure structural stability during heavy-duty tasks. Its unique design allows for 360-degree drill head rotation and swinging, making it ideal for reaching difficult angles on complex workpieces.

Model Number

ZJY4116

Technical Features

Capabilities

- Adjustable head rotation and swing
- Variable angle drilling capability
- Integrated precision depth stop
- Adjustable workpiece table

Construction Material

Cast Iron Base, Rigid Column

Key Features

Performance Highlights

1 360-deg

Drill Head Rotation
