

Adjustable Dual-Head LED Motion Sensor Light

This multi-functional sensor light is designed for both indoor and outdoor industry lighting applications. It features dual adjustable LED lamps and a built-in motion sensor for automatic activation.

Product Overview

Versatile Dual-Head Illumination

This adjustable dual-head LED motion sensor light utilizes advanced COB technology to deliver a powerful 300-lumen output. Designed for flexibility, the dual-head structure allows for precise angle adjustments to direct light exactly where needed. It features integrated PIR and light-sensing capabilities, making it an efficient, automated lighting solution for various indoor and outdoor environments.

Lighting Performance

Brightness

300 lm

Luminous Flux

Light Source

COB LED

Sensor Technology

Sensing Distance	8 m
Light Sensing Threshold	50 Lux
Sensor Types	PIR, Light Sensing

Design & Power

Power Source	3 x AA Batteries (not included)
Head Configuration	Dual-head adjustable
Color Options	Yes
