Overview

Professional Folding Workbench

This adjustable folding workbench is engineered for versatility and durability, featuring a robust steel and aluminum construction. Designed for high-precision tasks, it incorporates a dual crank system and hands-free clamping, making it ideal for woodworking and assembly. Its compact, foldable design allows for efficient storage without compromising on a high 100kg load capacity.

Technical Specifications

Maximum Load Capacity

100 KGS
Load Capacity

Dimensions (L x W x H) 60 x 58 x (77-107) cm

Construction Materials Steel, Aluminum

Features

Clamping Features

- Hands-free clamping
- Dual crank system
- Non-parallel clamping capability
