Product Overview

High-Efficiency Circulation Fan

This adjustable height circulation fan is engineered to deliver powerful, focused airflow, reaching distances of up to 12 meters. Its dynamic design features automatic oscillation both horizontally and vertically, ensuring optimal air distribution in any room. Built with durable ABS materials and a high-speed 1500 RPM motor, it provides a quiet and reliable cooling solution for residential or professional office spaces.

Technical Specifications

Voltage	220V
Frequency	50 Hz
Power Usage	55 W

Performance Metrics

Performance Key Metrics

1500 RPM
Rotate Speed

12 m
Max Air Distance

Construction & Design

Materials Used	ABS Plastic, AS Fan Blades
Fan Blade Diameter	7 inch

Electrical Details

Power Cord Specifications	2 * 0.75mm ² , 1.65m length
---------------------------	--

Operating Features

Oscillation Modes

- Automatic Right & Left
- Automatic Up & Down
