

Adjustable Height Pedestal Fan

This standing fan delivers airflow for indoor cooling. Its three-blade propeller is enclosed in a wire cage and mounted on an adjustable pole with a tripod base.

Overview

High-Performance Pedestal Fan

This adjustable height pedestal fan is engineered to provide efficient and reliable airflow for various indoor environments. Featuring a classic three-blade propeller design enclosed within a protective wire cage, it ensures both safety and optimal cooling performance. The unit is supported by a stable tripod base and includes an integrated control panel on the pole for easy speed and oscillation adjustments.

Design & Construction

Base Style	Tripod Base
Blade Configuration	3
Safety Features	Wire Cage, Protective Grille

Functionality

Adjustable Settings

- Height adjustment
- Speed control
- Oscillation

Recommended Use

Indoor Use • Residential • Commercial

Control Interface	Pole-mounted control panel
