Product Overview

Professional Task Lighting

This adjustable LED desk lamp is engineered for high stability and superior light efficiency, utilizing advanced chip technology for consistent performance. Designed with a high-quality aluminum radiator, it ensures optimal heat dissipation for long-term reliability. It serves as an energy-efficient replacement for traditional lighting, offering significant power savings while maintaining high brightness levels.

Technical Specifications

Energy Savings

62 %

Energy Efficiency Improvement

Power Consumption

5 W

Energy Saving Equivalent

13W traditional energy-saving lamp

Drive System

DC Drive

Operational Benefits

No Noise, No Flash, High Stability, High Color Quality

Design & Build

Key Design Attributes

- Adjustable positioning
- Compact size compatibility
- Efficient heat radiation

Radiator Material

High-quality aluminum
