

Adjustable Metal Mounting Bracket

This adjustable metal bracket features a slotted arm, bolt and nut assembly, and mounting hardware. It is suitable for various applications requiring adjustable support and secure fastening.

Product Overview

Versatile Adjustable Mounting Solution

This adjustable metal mounting bracket is engineered for flexible support and secure fastening across a wide range of industrial and commercial applications. Featuring a durable slotted arm design, it allows for precise positioning and easy installation. The included bolt and nut assembly ensures a reliable connection, making it an essential component for projects requiring adaptable hardware support.

Technical Specifications

Component Type

Mounting Bracket • Adjustable Support

Design Features

- Slotted arm for adjustment
- Includes bolt and nut assembly
- Heavy-duty metal construction

Suitability

Industrial, Construction, General Hardware
