

# Adjustable Pattern Impact Sprinkler Head

Impact sprinkler head designed for efficient irrigation with adjustable spray distance and pattern. It has a durable plastic construction and a standard threaded base for easy connection to irrigation systems.

## Product Overview

### Professional Impact Sprinkler

The 15PYS2 impact sprinkler head is engineered for reliable and efficient irrigation in both residential and commercial landscapes. Constructed from durable, high-quality plastic, this model ensures consistent performance and longevity in various environmental conditions. With its adjustable spray patterns and standard 3/4 inch inlet, it integrates seamlessly into existing irrigation infrastructure to provide optimal water coverage.

## Technical Specifications

Inlet Size	3/4 inch
Nozzle Diameter	4*3 mm

## Performance Metrics

### Core Operational Metrics

<b>0.25 Mpa</b> Operating Pressure	<b>1.9 m3/h</b> Capacity	<b>15 M</b> Coverage Radius
---------------------------------------	-----------------------------	--------------------------------

### Performance Ranges

Metric	Range
Pressure	0.20 - 0.30 Mpa
Capacity	1.71 - 2.1 m3/h
Radius	14.5 - 15.5 M
Density	2.59 - 2.78 mm/h

## Design and Compatibility

### Best For

- Residential Lawns
- Commercial Landscapes
- Agricultural Irrigation

Construction Material	Durable Plastic
-----------------------	-----------------
