

Adjustable T-Bevel with Aluminum Handle

This T-bevel is used for transferring angles, featuring a blade that pivots and locks. It includes a plastic strip along the aluminum handle for enhanced grip and lightweight strength.

Product Overview

Professional Sliding T-Bevel

This adjustable T-Bevel is designed for precise angle transferring and replication in woodworking and metalworking applications. Featuring a lightweight aluminum handle and a durable integrated plastic grip, this tool provides a secure hold for consistent accuracy. Its versatile, customizable design makes it an essential instrument for professional construction and detailed fabrication projects.

Construction & Design

Handle Material	Aluminum
