Product Overview

Professional Thermostatic Mixing Solution

This adjustable thermostatic mixing valve is engineered for precision, ensuring a constant and safe mixed water temperature in demanding plumbing and heating environments. Designed with high-quality components for long-term reliability, it provides an essential one-stop solution for consistent thermal management. The unit features an intuitive top-mounted control knob for easy temperature adjustments, making it suitable for a wide range of professional applications.

Available Specifications

15mm, 22mm

Key Features

Main Advantages

- Adjustable temperature control via top-mounted knob
- Constant mixed water temperature output
- Durable construction for long-lasting performance
- Threaded connections for easy installation
- Green manufacturing standards
