Product Overview

High-Performance Silent Cooling

This advanced pedestal fan utilizes a DC motor to deliver whisper-quiet operation as low as 26.7dB, ensuring comfort without disruption. Featuring an innovative duplex air spiral design, it achieves an impressive 10-meter wind delivery distance for superior circulation. Awarded the prestigious RedDot design prize, this fan blends modern aesthetics with intelligent oscillation technology for optimal air distribution.

Performance Metrics

Speed Settings	24 levels
Minimum Noise Level	26.7 dB
Max Air Delivery	10 m

Technical Features

Remote Control Range	6 m
Motor Technology	DC Motor
Oscillation Technique	Internal blade oscillation
