Product Overview

Precision Mini Slitting Solution

This adjustable width mini slitting machine is engineered for the precision cutting of materials into narrow strips, making it an ideal choice for small to medium-scale production environments. Its robust construction ensures stability and consistent performance, while the user-friendly interface allows for efficient operation. Designed to handle various materials including metal sheets, films, and foils, this machine delivers clean, accurate cuts with minimal material waste.

Technical Capabilities

Key Cutting Features

- Adjustable slitting widths
- High-speed operation
- Precision cutting blades
- Adjustable tension control

Safety Standards

Emergency stop buttons, Protective guards

Service & Quality

Quality Compliance

ISO 9001 Compliant • Pre-shipment Tested
