Product Overview

Professional Wire Stripping Precision

The WS-1 wire stripper is a precision hand tool engineered for efficient removal of insulation from electrical wires. It features adjustable jaws designed to accommodate various wire gauges, ensuring clean stripping results without damaging the underlying conductor. The tool is equipped with a spring-loaded mechanism for automatic opening, which enhances workflow speed and minimizes user fatigue during repetitive tasks.

Technical Specifications

Operational Mechanism	Spring-loaded automatic opening
Grip Design	Ergonomic handles for comfort and precise control
Adjustable Settings	Yes
Suitable Applications	Electrical Wiring, Insulation Removal, Precision Stripping
