Product Overview

Professional Power Conversion

The NV-P2000 is a high-performance pure sine wave power inverter designed to convert 24V DC battery power into stable 220-240V AC electricity. Engineered for versatility, it supports a wide array of household appliances and electronic devices, making it an ideal solution for emergency power backup, camping, and remote field operations. It features integrated safety protocols and robust construction for reliable, long-term performance.

Technical Specifications

Power Performance

2000 W

Continuous Power

4000 W

Peak Power

Voltage Ratings

Parameter	Value
Input Voltage	24V DC
Output Voltage	220-240V AC

Certifications & Compliance

Regulatory Standards

FC, CE, RoHS, e8

Features

Protection Mechanisms

- Overload protection
- Short circuit protection
- Thermal protection
- Integrated cooling fan
