

ADSS Cable Suspension Clamp (18.9-19.9mm)

This preformed suspension clamp is designed for ADSS cables with a diameter range of 18.9-19.9mm. It provides secure and reliable suspension of ADSS cables on transmission towers.

Product Overview

ADSS Suspension Clamp

This suspension clamp is engineered for the secure connection of ADSS cables to linear towers. It is specifically designed for applications where the corner or elevation angle is less than 25 degrees. The robust construction ensures reliable performance in outdoor environments, while the preformed design facilitates efficient and safe installation.

Technical Specifications

| | |
|----------------------|---------------|
| Cable Diameter Range | 18.9 - 19.9mm |
| Breaking Load | 80 kN |

Material Composition

Component Materials

| Component | Material |
|----------------------|--------------------------|
| Suspension Clamp | Aluminum alloy |
| Preformed Armour Rod | Aluminum alloy |
| Clamping Plate | Aluminum alloy |
| Yoke Plate | Hot-dip galvanized steel |
| Rubber Pad | EPDM |

Usage & Application

| | |
|---------------------|---|
| Max Elevation Angle | 25 degrees |
| Key Features | Preformed design, Easy installation, Outdoor rated, Corrosion resistant |
