

Advanced Jet Trainer Aircraft

This high-speed aircraft features a swept-wing design and a single jet engine. It is equipped with a bubble canopy for enhanced visibility and retractable landing gear.

Overview

Advanced Jet Trainer Aircraft

This advanced jet trainer aircraft is engineered for both high-level flight training and combat readiness. Featuring a streamlined fuselage, swept-wing design, and a high-visibility bubble canopy, it offers superior aerodynamic efficiency and pilot situational awareness. Equipped with a powerful single jet engine and retractable landing gear, this platform is built to support the rigorous demands of modern pilot instruction and tactical preparation.

Design & Aerodynamics

Wing Configuration	Swept-wing, mid-wing configuration
Empennage	T-tail
Canopy	Bubble canopy

Performance & Systems

Propulsion	Single jet engine
Landing Gear	Retractable
Fuel Storage	Wingtip fuel tanks

Operational Capabilities

Mission Profile	Advanced Flight Training, Combat Readiness
