

Aerosol Tire Inflator with Sealant

This aerosol tire inflator provides a temporary solution for repairing and inflating tires. It contains a sealant to plug punctures and compressed gas to inflate the tire to a usable pressure for emergency roadside use.

Product Overview

Emergency Tire Repair Solution

This aerosol tire inflator and sealant is designed for quick, roadside emergency repairs. It effectively plugs punctures while simultaneously inflating the tire with compressed gas to a driveable pressure. Compact and user-friendly, it allows drivers to safely reach the nearest service facility for professional maintenance.

Technical Specifications

Core Functions

- Seals tire punctures
- Rapid inflation
- Compact aerosol delivery

Application

Emergency Repair, Roadside Assistance, Temporary Sealing

Usage Guidelines

Intended Use Case

Emergency roadside use to reach a service station.
