

AG0/379A Alkaline Button Cell Battery

The AG0/379A Alkaline Button Cell is a compact and reliable power source designed for small electronic devices. With a voltage of 1.55V, this battery provides consistent performance and long-lasting power.

Overview

Compact Power Solution

The AG0/379A Alkaline Button Cell is a compact and reliable power source designed for small electronic devices. With a voltage of 1.55V, this battery provides consistent performance and long-lasting power. It is mercury-free (Hg 0%), making it a safe and versatile choice for various applications requiring a dependable button cell battery.

Technical Specifications

Rated Voltage

1.55 V

Voltage

Mercury Content

Mercury-Free • Hg 0%

Chemistry Type

Alkaline

Compatibility

Common Applications

- Watches
- Calculators
- Remote controls
- Small portable electronic devices

Identification

Compatible Model Numbers

AG0, 379A, A00/373A, AGO-373
