

AG7/LR57/LR927 Button Cell Battery

The AG7/LR57/LR927 is a button cell battery commonly used in small electronic devices. This silver oxide battery provides a stable voltage output and a long shelf life.

Product Overview

Reliable Power for Micro-Electronics

The AG7/LR57/LR927 button cell battery is a versatile power solution designed for low-drain electronic devices. Utilizing a stable Zinc-Manganese Dioxide (Zn-MnO₂) chemistry, this battery provides a consistent 1.50V output. It is an ideal choice for compact applications such as watches, calculators, and small toys, offering a reliable 42mAh capacity.

Technical Specifications

Chemistry System	Zn-MnO ₂
Standard Voltage	1.5 V
Standard Capacity	42 mAh
Average Weight	0.63 g

Performance & Storage

Discharge Performance

48 h

Minimum Duration

Storage Time	12 months
--------------	-----------

Logistics & Packaging

Packaging	Carton, Cardboard, Plastic tray
-----------	---------------------------------
