

Agricultural Irrigation Water Pump

This water pump is designed for agricultural irrigation and drainage systems. It is engineered for optimal flow rate and pressure, ensuring efficient water distribution.

Product Overview

High-Efficiency Agricultural Irrigation Pump

This industrial-grade water pump is engineered specifically for large-scale agricultural irrigation and drainage systems. Built for durability and reliable operation, it excels in extracting water from diverse sources including wells, rivers, and reservoirs. Its design ensures optimal flow rate and consistent pressure, providing a dependable solution for professional water management.

Performance

Key Performance Indicators

1 Irrigation

Primary Application

1 Drainage

System Compatibility

Construction

Design Features

- Durable construction for long-term use
- High-efficiency fluid dynamics
- Resistant to harsh environmental conditions
- Optimized pressure and flow control

Application

Certifications

Industrial Standard • Agricultural Grade

Suitable Water Sources

Wells, Rivers, Reservoirs
